CAREER SUMMARY

React Native Developer with 3+ years of experience building high-performance mobile applications for fintech and banking domains. Specialized in architecting scalable applications from scratch using TypeScript, Redux, and modern React Native patterns. Proven expertise in optimizing complex data-intensive UIs, implementing real-time features, and delivering production-ready solutions.

TECHNICAL SKILLS

Mobile Development: React Native, Expo, iOS & Android Development,
Languages: TypeScript, JavaScript, Python, SQL
Frontend: React.js, Redux Toolkit, Context API, React Hooks, Angular, Ionic
Backend: Node.js, Express.js, PostgreSQL, MongoDB, Firebase, RESTful APIs
Testing: Appium, WebdriverIO, Mocha
Tools & DevOps: Git, Bitbucket, Postman, Flipper, Chrome DevTools

WORK EXPERIENCE

Software Engineer | Synapsewave Innovations Pvt Ltd (formerly 63 Moons)

May 2023 - Present

Project: Enterprise Stock Broking Platform

- ❖ Led architectural migration of enterprise stock broking application from Ionic to React Native with TypeScript across 50+ screens.
- ❖ Optimized rendering for 1000+ stock watchlist with real-time updates using memoization and debounced price streams.
- ❖ Implemented automated E2E testing using Appium and WebdriverIO, improving test coverage.
- ❖ Architected multi-factor authentication system (2FA, MPIN, Biometrics) with secure session management.
- ❖ Built reusable TypeScript component library (Button, TextInput, OTP Input) reducing development time by 40%.
- ❖ Implemented WebSocket integration for live market data with automatic reconnection and message queuing.
- ❖ Developed JSON-driven dynamic navigation enabling runtime menu configuration without app updates.
- ❖ Enhanced push notifications with custom Android UI and Notifee for background/foreground handling.
- ❖ Managed React Native migration from 0.71 to 0.80, resolving breaking changes while maintaining compatibility.
- ❖ Led React Native training for development team and drove POC development for new features.
- ❖ Established code standards with ESLint, Prettier, TypeScript strict mode and conducted code reviews.

Software Engineer | Suvi

Feb 2022 - Apr 2023

Project: Banking Services Mobile Application

- ❖ Developed and launched banking application similar to Jupiter with comprehensive financial transaction features.
- ❖ Implemented micro-frontend architecture using Webpack Module Federation for independent module deployment.
- ❖ Integrated biometric authentication (Face ID/Touch ID) for secure app access.
- ❖ Built banking services UI in React Native with Node.js backend using PostgreSQL.
- ❖ Developed custom animated components using Reanimated 2 for enhanced user experience.

Technical Intern | Incredible Visibility

Apr 2021 - Jan 2022

Project: Human Resources Management System

- ❖ Developed internal HRMS application using React Native and Expo for employee monitoring, attendance tracking, and location management.
- ❖ Built custom UI components and integrated backend APIs for real-time employee data synchronization.

Python Developer Intern | Trisha Stock Broking Pvt. Ltd

Sep 2019 - Jan 2020

Project: Management Information System

- ❖ Built MIS (Management Information System) desktop application using PyQt5 for stock market data analysis

EDUCATION AND CERTIFICATION

Bachelor of Engineering in EXTC | Shah and Anchor Engineering College, Mumbai University

2019
